

PTO/SB/30 (08-00)

Approved for use through 10/31/2002. OMB 0851-0031  
U.S. Patent and Trademark Office: U.S. DEPARTMENT OF COMMERCE  
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

# REQUEST FOR CONTINUED EXAMINATION (RCE) TRANSMITTAL

Subsection (b) of 35 U.S.C. § 132, effective on May 29, 2000,  
provides for continued examination of an utility or plant application  
filed on or after June 8, 1995.  
See The American Inventors Protection Act of 1999 (AIPA).

Application Number	09/908,696
Filing Date	July 20, 2001
First Named Inventor	NOBUYOSHI KAKIGI
Group Art Unit	2622
Examiner Name	Iraj A. Rahimi
Attorney Docket Number	03500.015584

This is a Request for Continued Examination (RCE) under 37 C.F.R. § 1.114 of the above-identified application.

**NOTE:** 37 C.F.R. § 1.114 is effective on May 29, 2000. If the above-identified application was filed prior to May 29, 2000, applicant may wish to consider filing a continued prosecution application (CPA) under 37 C.F.R. § 1.53(d) (PTO/SB/28) instead of a RCE to be eligible for the patent term adjustment provisions of the AIPA. See Changes to Application Examination and Provisional Application Practice, Final Rule, 65 Fed. Reg. 50092 (Aug. 16, 2000); Interim Rule, 65 Fed. Reg. 14865 (Mar. 20, 2000), 1233 Off. Gaz. Pat. Office 47 (Apr. 11, 2000), which established RCE practice.

## 1. Submission required under 37 C.F.R. § 1.114

### a. ☒ Previously submitted

- i. ☒ Consider the amendment(s)/reply under 37 C.F.R. § 1.116 previously filed on November 30, 2005.  
(Any unentered amendment(s) referred to above will be entered).
- ii. ☐ Consider the arguments in the Appeal Brief or Reply Brief previously filed on \_\_\_\_\_
- iii. ☐ Other \_\_\_\_\_

### b. ☐ Enclosed

- i. ☐ Amendment/Reply
- ii. ☐ Affidavit(s)/Declaration(s)
- iii. ☐ Information Disclosure Statement (IDS)
- iv. ☐ Other \_\_\_\_\_

## 2. Miscellaneous

- a. ☐ Suspension of action on the above-identified application is requested under 37 C.F.R. § 1.103(c) for a period of \_\_\_\_\_ months. (Period of suspension shall not exceed 3 months; Fee under 37 C.F.R. § 1.17(f) required)
- b. ☐ Other \_\_\_\_\_

## 3. Fees

The RCE fee under 37 C.F.R. § 1.17(e) is required by 37 C.F.R. § 1.114 when the RCE is filed.

- a. ☒ The Director is hereby authorized to charge any deficiencies in the following fees, or credit any overpayments, to Deposit Account No. 06-1205
- i. ☒ RCE fee required under 37 C.F.R. § 1.17(e)
- ii. ☐ Extension of time fee (37 C.F.R. §§ 1.136 and 1.17) 01/04/2006 HSLUTERR1 00000016 09908696
- iii. ☐ Other 01 FC:1801 790.00 00
- b. ☒ Check in the amount of \$ 790.00 is enclosed
- c. ☐ Payment by credit card (Form PTO-2038 enclosed)

REQUEST FOR REFUND

Sir:

In connection with the above-identified application, Applicants request a refund of \$120.00 for a one-month extension fee that was erroneously charged to our Deposit Account 06-1205. It is requested that the refund be applied as a credit to that deposit account. The reason for the refund is explained below.

On November 30, 2005, Applicants filed an Amendment After Final Rejection. There were no extension fees due at that time. On December 30, 2005, Applicants filed a Request for Continued Examination (RCE). Because the Amendment After Final Rejection was filed within two months, and the RCE was filed within three months, of the date of the Office Action, no extension fees were due. A copy of the Amendment and RCE are attached.

The Patent Office's Monthly Statement of Deposit Account, dated January 2006 (copy attached), indicates that Deposit Account No. 06-1205 was charged the fee of \$120.00 for a 1 month extension. Applicants respectfully submit that a refund of \$120.00 is due.

Accordingly, Applicants hereby request a refund and authorize the Commissioner to credit Deposit Account No. 06-1205 in the amount of ~~\$120.00~~ to resolve this matter.

Applicants' undersigned attorney may be reached in our Costa Mesa, CA office at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Frank L. Cire

IN THE CLAIMS:

Please amend Claims 21, 22, 26, 27, 31, 32, 36 and 37 as shown below.

The claims, as pending in the subject application, now read as follows:

1. to 20. (Canceled)

21. (Currently amended) An image recording apparatus, comprising:

an attachment unit, adapted to attach a detachable memory to said image recording apparatus, the memory storing a plurality of image data and a plurality of attribute data corresponding to the plurality of image data, each attribute data having a plurality of attributes, each attribute including attribute information;

a designation unit, adapted to designate one [[an]] attribute from among the plurality of attributes;

a recording unit, adapted to record the plurality of image data read from the memory attached by said attachment unit on a recording paper; and

a determination unit, adapted to make a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated by said designation unit are recorded are output to the same output port ~~determine a paper output port for the recording paper on which the image data read from the attached memory is recorded by said recording unit, based on the attribute designated by said designation unit and the attribute data corresponding to the image data read from the attached memory.~~

22. (Currently amended) An apparatus according to claim 21, wherein the plurality of image data are obtained by a digital camera and the attribute information is added by the digital camera ~~said determination unit makes a determination such that a plurality of recording papers on which a plurality of the image data with the same attribute data are recorded are outputted to the same output port.~~

23. (Previously presented) An apparatus according to claim 21, wherein the attribute includes a title.

24. (Previously presented) An apparatus according to claim 21, wherein the attribute includes a photographing date.

25. (Previously presented) An apparatus according to claim 21, wherein the attribute includes a destination user.

26. (Currently amended) An image recording apparatus, comprising:  
~~a designation unit, adapted to designate an attribute;~~  
a read unit, adapted to read, from a memory storing a plurality of image data  
and a plurality of attribute data corresponding to the plurality of image data, wherein each attribute data has a plurality of attributes and each attribute includes attribute information from a memory; [[and]]  
a designation unit, adapted to designate one attribute from among the plurality of attributes; and

a determination unit, adapted to make a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated by said designation unit are recorded are output to the same output port ~~determine a paper output port for a recording paper on which the image data read from the memory by said read unit is recorded, based on the attribute designated by said designation unit and the attribute data corresponding to the image data read from the memory.~~

27. (Currently amended) An apparatus according to claim 26, wherein the plurality of image data are obtained by a digital camera and the attribute information is added by the digital camera ~~said determination unit makes a determination such that a plurality of recording papers on which a plurality of the image data with the same attribute data are recorded are outputted to the same output port.~~

28. (Previously presented) An apparatus according to claim 26, wherein the attribute includes a title.

29. (Previously presented) An apparatus according to claim 26, wherein the attribute includes a photographing date.

30. (Previously presented) An apparatus according to claim 26, wherein the attribute includes a destination user.

31. (Currently amended) A method of determining a paper output port, comprising:

a step of reading, from a memory storing a plurality of image data and a plurality of attribute data corresponding to the plurality of image data, wherein each attribute data has a plurality of attributes and each attribute includes attribute information from a memory,

a step of designating one ~~[[an]]~~ attribute from among the plurality of attributes; and

a step of making a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated in said designating step are recorded are output to the same output port ~~determining a paper output port for a recording paper on which the image data read from the memory in said reading step is recorded, based on the attribute designated in said designating step and the attribute data corresponding to the image data read from the memory in said reading step.~~

32. (Currently amended) A method according to claim 31, wherein the plurality of image data are obtained by a digital camera and the attribute information is added by the digital camera ~~said determining step makes a determination such that a plurality of recording papers on which a plurality of the image data with the same attribute data are recorded are outputted to the same output port.~~

33. (Previously presented) A method according to claim 31, wherein the attribute includes a title.

34. (Previously presented) A method according to claim 31, wherein the attribute includes a photographing date.

35. (Previously presented) A method according to claim 31, wherein the attribute includes a destination user.

36. (Currently amended) A program stored on a computer-readable medium, comprising:

a step of reading, from a memory storing a plurality of image data and a plurality of attribute data corresponding to the plurality of image data, the plurality of image data wherein each attribute data has a plurality of attributes and each attribute includes attribute information from a memory;

a step of designating one [[an]] attribute from among the plurality of attributes; and

a step of making a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated in said designating step are recorded are output to the same output port ~~determining a paper output port for a recording paper on which the image data read from the memory in said reading step is recorded, based on the attribute designated in said designating step and the attribute data corresponding to the image data read from the memory in said reading step.~~

37. (Currently amended) A program stored on a computer-readable medium according to Claim 36, wherein the plurality of image data are obtained by a digital camera and the attribute information is added by the digital camera ~~said determining step makes a determination such that a plurality of recording papers on which a plurality of the image data with the same attribute data are recorded are outputted to the same output port.~~

38. (Previously presented) A program stored on a computer-readable medium according to Claim 36, wherein the attribute includes a title.

39. (Previously presented) A program stored on a computer-readable medium according to Claim 36, wherein the attribute includes a photographing date.

40. (Previously presented) A program stored on a computer-readable medium according to Claim 36, wherein the attribute includes a destination user.

### REMARKS

This application has been carefully reviewed in light of the Office Action dated September 30, 2005. Claims 21 to 40 are pending in the application, of which Claims 21, 26, 31 and 36 are independent. Reconsideration and further examination are respectfully requested.

Claims 21 to 40 were rejected under 35 U.S.C. § 102(e) over U.S. Patent No. 6,714,313 (Sugaya). Reconsideration and withdrawal of this rejection are respectfully requested.

The present invention concerns an image recording apparatus. The image recording apparatus may record multiple images, such as photographs. Each image may be provided with attribute data. The attribute data may include a plurality of attributes, such as a title of the image, an image recording date or a destination user. In addition, each attribute includes attribute information. For example, a recording date attribute includes attribute information regarding an actual date. If a user designates an attribute of an image recording date, then a plurality of recording papers on which a number of images with the same recording date are output to the same output port on the image recording apparatus.

Turning to specific claim language, amended independent Claim 21 is directed to an image recording apparatus which includes: an attachment unit, adapted to attach a detachable memory to the image recording apparatus, the memory storing a plurality of image data and a plurality of attribute data corresponding to the plurality of image data, each attribute data having a plurality of attributes, each attribute including attribute information; a designation unit, adapted to designate one attribute from among the plurality of attributes; a recording unit, adapted to record the plurality of image data read from the memory attached by the attachment unit on a recording paper; and a determination unit, adapted to make a determination such that a plurality of recording papers on which a

number of image data with the same attribute information included in the attribute designated by the designation unit are recorded are output to the same output port.

Amended independent Claim 26 is directed to an image recording apparatus, comprising: a read unit, adapted to read, from a memory storing a plurality of image data and a plurality of attribute data corresponding to the plurality of image data, wherein each attribute data has a plurality of attributes and each attribute includes attribute information; a designation unit, adapted to designate one attribute from among the plurality of attributes; and a determination unit, adapted to make a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated by said designation unit are recorded are output to the same output port.

Claim 21 as amended now recites that the designation unit designates one attribute from among a plurality of attributes and the determination unit makes a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the designated attribute are recorded are output to the same output port.

Sugaya discloses outputting a plurality of jobs of the same user to the same bin. Sugaya, however, fails to disclose or suggest a designation unit, adapted to designate one attribute from among a plurality of attributes and a determination unit, adapted to make a determination such that a plurality of recording papers on which a number of image data with the same attribute information included in the attribute designated by the designation unit are recorded are output to the same output port

Therefore, Applicants submit that Claims 21 and 26 are in condition for allowance and respectfully request same.

Claims 31 and 36 are directed to a method and a program stored on a computer-readable medium, respectively, corresponding to the apparatus of Claim 26. Applicants submit that the discussion above in support of Claim 26 applies equally to Claims 31 and 36. Therefore, Applicants submit that Claims 31 and 36 are in condition for allowance and respectfully request same.

The other pending claims in this application are each dependent from the independent claims discussed above and are therefore believed patentable for at least the same reasons. However, individual consideration of each dependent claim on its own merits is respectfully requested as each dependent claim is also deemed to define an additional aspect of the invention.

In view of the foregoing amendments and remarks, the entire application is believed to be in condition for allowance, and such action is respectfully requested at the Examiner's earliest convenience.

Applicants' undersigned attorney may be reached in our Costa Mesa, CA office at (714) 540-8700. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Frank L. Cire
